EDUCATION

Vellore Institute of Technology, Bhopal

Bachelor of Technology in Computer Science and Engineering

- CGPA: 8.34 / 10

Bhopal, India

2022 – 2026

EXPERIENCE

Freelance Data Analyst

Sept 2025 – Present

Self-Employed

Onsite

- Developed automated data extraction and analysis solutions for a small business using Python data manipulation tools
- Created interactive dashboards and reports using PowerBI to visualize key performance metrics and trends
- Performed statistical analysis and data cleaning on datasets ranging from 1K to 10K records using Pandas and NumPy
- Implemented machine learning models for predictive analysis, improving client decision-making processes

PROJECTS

Machine Learning-Based Data Analysis Pipeline | *Python, Pandas, Scikit-learn* | [GitHub](#)

- Built an end-to-end ML pipeline to analyze and predict trends from large datasets (1000 records)
- Automated data cleaning, feature engineering, and exploratory analysis using Pandas and NumPy
- Trained and optimized regression/classification models, improving accuracy by 15% via hyperparameter tuning
- Used GitHub for version control and collaborative documentation to ensure reproducibility

Machine Learning Model for GST Data Analysis | *Python, XGBoost, Scikit-learn, Pandas* | [GitHub](#)

- Developed a machine learning model to classify and predict tax-related behavior from GST data
- Evaluated various models including XGBoost, ANN, and Random Forest, selecting XGBoost for its high performance
- Engineered features and performed hyperparameter tuning using Optuna to optimize model accuracy
- Achieved an accuracy of 97.84%, a precision of 0.8496, and a recall of 0.9394, resulting in a robust F1-score of 0.8923

Zomato Restaurant Data Analysis | *Python, Pandas, Matplotlib, Seaborn* | [GitHub](#)

- Explored and analyzed a dataset of 148 restaurants to uncover actionable insights for business strategy
- Performed advanced data cleaning, feature engineering (rating normalization, missing value checks) with Pandas
- Conducted EDA and visualized trends across 7+ attributes (cost, votes, ratings, online order preference) using Matplotlib/Seaborn
- Utilized groupby, pivot tables, and correlation analysis to identify factors driving customer engagement

TECHNICAL SKILLS

Languages: Python, SQL, C++

Data Analysis Tools: Pandas, NumPy, Matplotlib, Scikit-learn

Web Scraping & Automation: Playwright, BeautifulSoup

Databases: MySQL

Tools: Git, GitHub, VSCode, Jupyter Notebook, Google Colab

Coursework: Data Structures and Algorithms, Operating Systems, OOPs, DBMS

EXTRACURRICULAR ACTIVITIES

- Solved over 500 Data Structures and Algorithms on platforms like Leetcode and Codeforces
- Regional Chess Player – Participated in state-level tournaments
- Cadet, National Cadet Corps, Kanker (March 2017 – April 2018)
