EDUCATION

Vellore Institute of Technology

Bachelor of Technology in Computer Science and Engineering

Aug. 2022 – May 2026

CGPA: 8.19/10

TECHNICAL SKILLS

Data Science & ML: Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, XGBoost, Jupyter

GenAI & LLMs: Langchain, RAG Architecture, Prompt Engineering, Vector Databases (ChromaDB), Groq API

DevOps & Cloud: Git, GitHub, Docker, n8n, Cloud (AWS) [Familiar]

Languages & Databases: SQL, MySQL, C++

PROJECTS

MailSaathi | *Python, LangChain, Streamlit, JSON Parsing* | [GitHub Link](#)

- Engineered an intelligent inbox management tool using **LLMs** (Llama-3 via Groq) to automate email categorization, action item extraction, and drafting.
- Designed a **context-aware Chat Agent** capable of querying the entire inbox by analyzing email metadata and body content.
- Implemented strict **JSON output parsing** to reliably extract tasks and deadlines from unstructured text, ensuring high data integrity for the frontend.
- Demonstrated proficiency in **Prompt Engineering** to control LLM hallucinations and enforce professional tone in auto-replies.

SamacharX | *Python, LangChain, Telegram & WhatsApp APIs*

- Engineered a fully automated news pipeline that ingests articles from RSS feeds and utilizes **Trafilatura** for robust content extraction.
- Integrated **LLMs** (via Groq) to intelligently summarize and rewrite news stories with a specific persona, ensuring high-quality, engaging content.
- Designed a **'Human-in-the-Loop' Telegram bot** for real-time editorial review, enabling users to approve or reject AI-generated summaries via interactive buttons.
- Orchestrated automated multi-channel publishing, delivering approved content directly to WhatsApp audiences using the **WhatsApp Cloud API**.
- Implemented strict **JSON output parsing** and **SQLite state management** to ensure reliable data processing and system integrity.

GST Data Analysis & Classification Model | *Python, XGBoost, Pandas, Scikit-learn, Jupyter* | [GitHub Link](#)

- Built a high-performance classification model to predict tax-related behavior using transactional GSTN data, achieving an **Accuracy of 97.84%**.
- Selected and tuned **XGBoost** after benchmarking against ANN and Random Forest; optimized for **F1-score** to handle class imbalance effectively.
- Conducted extensive hyperparameter tuning (Grid Search/Optuna) to optimize Learning Rate and Max Depth, resulting in a robust AUC-ROC of 0.99.

TECHNICAL ACHIEVEMENTS

- Solved over **500+ Data Structures and Algorithms** problems on platforms like LeetCode and Codeforces.

EXTRACURRICULAR ACTIVITIES

- Former **NCC Cadet**: Participated in National Cadet Corps training, developing leadership, discipline, and teamwork skills.
- Regional Level Chess Player**: Competed in regional chess tournaments, demonstrating strategic thinking and analytical problem-solving abilities.
