EDUCATION

Vellore Institute of Technology

Bachelor of Technology in Computer Science and Engineering

Aug. 2022 – May 2026

CGPA: 8.19/10

TECHNICAL SKILLS

Languages & Databases: Python, SQL (MySQL), C++, HTML, CSS

Data Engineering & ML: Apache Spark, PySpark, FastAPI, Pydantic, Pandas, NumPy, Scikit-learn, XGBoost

GenAI & LLMs: Langchain, RAG Architecture, Prompt Engineering, Vector Databases (ChromaDB), Groq API

DevOps & Operations: Git/GitHub, Docker, CI/CD (GitHub Actions), Amazon Web Services (AWS), Linux/Unix

Core Concepts: Software Systems Design, Deployment Procedures, Maintenance Processes, Robust Documentation

PROJECTS

SamacharX: Distributed Data Pipeline | *PySpark, Docker, LangChain, WhatsApp API*

December 2024

- Designed a **Medallion Architecture** (Bronze/Silver/Gold) pipeline to ingest, clean, and summarize 500+ daily news records using **PySpark** for distributed processing.
- Implemented a **Human-in-the-Loop** editorial system via Telegram, ensuring 100% quality control for AI-generated summaries before production deployment.
- Containerized application using **Docker** to ensure environment parity and streamlined **maintenance processes** across local and production environments.
- Integrated LLMs via Groq to automate high-fidelity summarization, fulfilling specific **user requirements** for crisp, multi-channel news delivery.

MailSaathi: Microservice Email Assistant | *Python, GitHub Actions, LLMs, JSON Parsing*

November 2024

- Architected an intelligent inbox tool reducing manual sorting time by 70% through automated LLM-based categorization and action item extraction.
- Gathered user requirements and feedback to build a context-aware agent for complex metadata querying.
- Established a **CI/CD pipeline** using GitHub Actions to automate unit testing and code linting, ensuring **robust documentation** and system reliability.
- Applied strict JSON output parsing and error-handling to maintain data integrity for unstructured LLM responses.

Scalable GST Classification Model | *Apache Spark, XGBoost, Pandas, Scikit-learn*

October 2024

- Built a high-performance model to predict tax-related behavior on a dataset of 260K+ records, achieving **97.84% accuracy**.
- Optimized model performance by migrating training workflows to **Spark-based distributed computing**, reducing latency compared to local Pandas execution.
- Conducted extensive hyperparameter tuning (Optuna) and F1-score optimization to address class imbalance in transactional GSTN data.

TECHNICAL ACHIEVEMENTS

- Solved over **500+ Data Structures and Algorithms** problems across LeetCode and Codeforces. ([Coding Profile](#))

EXTRACURRICULAR ACTIVITIES

- **NCC Cadet:** Developed leadership, discipline, and accountability through rigorous National Cadet Corps training.
- **Strategic Problem Solving:** Regional Chess Player, applying analytical skills to competitive tournament scenarios.
